

# Taylor Putman

## Full-Stack Software Engineer | Industrial Software & AI Systems

[devbyttaylor.com](https://devbyttaylor.com) | [Github](#) | [Linkedin](#) | [taylorputman41@gmail.com](mailto:taylorputman41@gmail.com) | 603-440-3325

Full-Stack Software Engineer with 2+ years of experience building scalable web applications, industrial data systems, and AI-assisted software solutions. Skilled in Python, JavaScript, API development, PostgreSQL, and modern frontend frameworks, with hands-on experience integrating manufacturing workflows, structured data pipelines, and LLM-powered tools into production environments. Passionate about industrial software, automation, and AI engineering.

---

### Skills

**Languages:** Python, JavaScript, TypeScript, HTML/CSS

**Frameworks:** React, Next.js, Node.js, Express, Flask

**Databases & Tools:** PostgreSQL, MySQL, MongoDB, Git, GitHub Actions, AWS, Firebase

**AI & Concepts:** OpenAI API, prompt engineering, REST APIs, TDD, SOLID, asynchronous programming

**Industrial Systems:** SECS/GEM, TransSECS, industrial data integration

---

### Experience

**Applications Solutions Developer — ErgoTech Systems** | Remote | May 2026 – Present

- Build industrial data collection and monitoring applications using MStudio for semiconductor and manufacturing environments
- Connect equipment, industrial APIs, and structured data sources to production-facing dashboards and workflow systems
- Support SECS/GEM and TransSECS integrations for industrial communication and equipment data exchange
- Troubleshoot real-time data flow, connectivity, and system integration issues across manufacturing systems
- Develop UI-driven operational tools used by engineering and production teams in live environments

**Software Engineering Resident — Coding Temple** | Internship · Remote | Mar 2026 – May 2026

- Developed full-stack applications and RESTful APIs using React, Node.js, Express, and PostgreSQL
- Applied unit testing, agile development practices, and AI-assisted debugging workflows

**AI Data Quality Analyst (Multimodal) — Handshake AI** | Contract · Remote | Feb 2026 – Present

- Designed and evaluated multimodal LLM prompts while validating and structuring datasets to improve AI output quality, consistency, and hallucination reduction.

**Software Engineer Apprentice — Coding Temple** | Remote | Apr 2025 – Oct 2025

- Built full-stack applications using React, TypeScript, and Flask with API-driven architecture
- Implemented secure authentication systems and practiced TDD using Git-based collaborative workflows

**Process Engineer Technician — onsemi** | Hudson, NH | Mar 2022 – Dec 2023

- Designed production data tracking systems and standardized manufacturing workflows through 50+ SOPs
- Improved production efficiency by 15% through process optimization initiatives

**Engineering Technician IV — onsemi** | Hudson, NH | Aug 2021 – Mar 2022

- Led technicians in supporting production, safety, and equipment reliability initiatives
- Trained new employees on equipment operation, troubleshooting, and standard procedures

---

### Projects

**Field Force** — Python, React, PostgreSQL, SQLAlchemy, JWT

- Architected and developed a multi-tenant workflow management platform connecting clients, vendors, and contractors
- Built secure RESTful backend services with PostgreSQL, SQLAlchemy, and JWT authentication
- Developed a React operations dashboard for work order management, contractor ticketing, vendor coordination, and invoicing

**Production-Ready Service Management REST API** — Python, Flask, MySQL, SQLAlchemy, JWT

- Designed and deployed a secure REST API with JWT authentication, scalable database architecture, and Swagger documentation
- Implemented CI/CD pipelines, optimized database queries, and standardized structured application data workflows

---

### Education

**Coding Temple, Certificate - Software Engineering**

**Montana State University, Bozeman, B.S. Chemical Engineering**
